

Nellie R. Stevens Holly

Ilex x 'Nellie R. Stevens'

Nellie R. Stevens holly is a fast grower with dense branches. Its growth habit makes it an excellent choice for either a specimen plant as a tall background plant or screen. Planted in groups, Nellies can create an impressive statement. An abundance of large, bright orange-red berries contrast nicely against its dark evergreen foliage. Matures at 25-40' tall by 10' wide. Zones 6b-9.
